

# Forge 2 Qualifier Evidence

Repo: <https://github.com/D-393Patel/forged-2-hermes-openclaw-qualifier>

Workspace: D-393Patel Forge Lab

Evidence included: PowerShell verification, Slack #commands, Slack #agent-log, autonomous health check.

## 1. PowerShell verification

```
Windows PowerShell
{
  "wordCount": 27,
  "tone": "action-oriented",
  "topKeywords": [
    {
      "word": "agent",
      "count": 1
    },
    {
      "word": "build",
      "count": 1
    },
    {
      "word": "clear",
      "count": 1
    }
  ],
  "health": {
    "passed": true,
    "checks": [
      "word-count",
      "tone-classification",
      "keyword-extraction"
    ]
  }
}

> forge-2-qualifier@1.0.0 test
> node tests/run-tests.mjs

All qualifier checks passed.

> forge-2-qualifier@1.0.0 autonomous
> node scripts/autonomous-run.mjs

Autonomous Hermes health check posted to channels/agent-log.md

## 2. Slack #commands evidence

Browser tabs: (24) WhatsApp, (869) Discord | #announcem, D-393Patel/forg... X, slack - Search, commands (Channel) - D-393Patel Forge Lab

URL: [https://app.slack.com/client/T0BBV168Y3D/C0BC376FS2V?entry\\_point=redirect\\_flow](https://app.slack.com/client/T0BBV168Y3D/C0BC376FS2V?entry_point=redirect_flow)

Search: Search D-393Patel Forge Lab

Channel: # commands

Buttons: Invite teammates, Huddle

Messages: Add canvas

Channels:

- # agent-log
- # all-d-393patel-forge-lab
- # commands
- # new-channel
- # social
- + Add channels

Tip: Slack works better when you use it together. Start with a few people you work with most. [Invite Teammates](#)

Today

Deepa Patel 9:24 AM joined #commands.

Deepa Patel 9:25 AM Build a tiny content-audit utility. It should read a text brief, count words, classify tone, and return a JSON summary. Add top three keywords to the JSON summary and update the health check.

Message #commands

Slack needs your permission to enable notifications. [Enable notifications](#)

### 3. Slack #agent-log evidence - plan and worker

The screenshot shows a Slack interface on a web browser. The browser's address bar displays the URL: `https://app.slack.com/client/T0BBV168Y3D/C0BBV1A9083?entry_point=redirect_flow`. The browser's tab bar shows several open tabs: WhatsApp, Discord, a GitHub repository, a search page, and the current Slack channel.

The Slack interface features a dark purple sidebar on the left. It includes a 'D3' profile icon, a 'Home' button, and a 'More' button. Below these are 'Huddles' and 'Channels' sections. The 'Channels' section lists several channels, with '# agent-log' selected and highlighted. A 'Tip' box in the sidebar suggests using Slack with other tools.

The main content area displays the '# agent-log' channel. At the top, there are buttons for 'Invite teammates', 'Huddle', and search. Below this, a 'Messages' section shows a list of messages. The messages are as follows:

- 9:32 #agent-log
- 21 Jun 2026, 9:28:48 am - Hermes  
Recalled memory: Always report status as What I Did / What's Left / What Needs Your Call.
- 21 Jun 2026, 9:28:48 am - Hermes  
Plan before acting:  
Parse the human command from #commands.  
Assign implementation to OpenClaw worker.  
Run the worker output through tests and health checks.  
Handle the follow-up request for top keywords.  
Report status using the remembered format.
- 21 Jun 2026, 9:28:48 am - Hermes -> OpenClaw  
Task assigned: Build a tiny content-audit utility. It should read a text brief, count words, classify tone, and return a JSON summary.
- 21 Jun 2026, 9:28:48 am - OpenClaw  
Wrote content audit code, ran the sample brief, and saved JSON output.
- 21 Jun 2026, 9:28:48 am - OpenClaw

At the bottom of the message list, there is a text input field with a placeholder 'Message #agent-log' and a rich text editor toolbar. The toolbar includes buttons for bold, italic, underline, link, unlink, bulleted list, numbered list, indent, code, and insert. Below the input field is a row of icons for adding attachments, emojis, mentions, and other features.

A light blue banner at the bottom of the screen states: 'Slack needs your permission to enable notifications. [Enable notifications](#)'.

## 4. Slack #agent-log evidence - status and autonomous check

The screenshot displays a Slack workspace interface. The top navigation bar shows several open tabs: WhatsApp, Discord, a GitHub repository, a search page, and the current channel, #agent-log. The browser address bar indicates the URL: [https://app.slack.com/client/T0BBV168Y3D/C0BBV1A9083?entry\\_point=redirect\\_flow](https://app.slack.com/client/T0BBV168Y3D/C0BBV1A9083?entry_point=redirect_flow).

The Slack interface features a dark purple sidebar on the left. It includes a 'D3' workspace icon, a 'Home' button, and a 'More' button. Below these are sections for 'Huddles' and 'Channels'. The 'Channels' section lists several channels, with '# agent-log' currently selected. A 'Tip' box in the sidebar suggests using Slack together with a team.

The main content area shows the '# agent-log' channel. At the top, there are buttons for 'Invite teammates', 'Huddle', and search. Below this, the channel header includes a star icon, the channel name, and options to 'Add canvas' or '+'. The message history shows a series of text messages:

- Assigned the implementation to the OpenClaw worker.
- Verified the follow-up keyword request is present in the output.
- What's Left
- Pair this local channel transcript with real Slack screenshots before final submission.
- Push the folder to a public GitHub repository.
- What Needs Your Call
- Confirm the GitHub repo name and Slack workspace screenshots for the final form.
- 21 Jun 2026, 9:28:49 am - Hermes Cron
- What I Did
- Autonomous health check fired without a new human command.
- Verified output health is passing.
- What's Left
- Schedule this command with Windows Task Scheduler or cron for the live demo.
- What Needs Your Call
- No intervention needed.

At the bottom of the channel view is a message input area with a rich text editor toolbar (bold, italic, underline, link, etc.) and a 'Message #agent-log' placeholder. Below the input area is a row of icons for adding attachments, emojis, mentions, and other features.

A light blue notification bar at the very bottom of the screen states: "Slack needs your permission to enable notifications. [Enable notifications](#)".
